VISION

Mural Projector Screen 200x200cm APPP200

With the Approx wall projection screen you get a product with excellent quality. With its mechanical retention you can manually lower the screen and stop wherever and adapts well to different projection formats.

This screen is suitable for any type of projector, even for a 3D projector. With a gain factor of 1.0 which is optimized for projections with LCD and DLP projectors.

Its black back ensures that no light is lost and the projection is always sharp. You can also hang the screen in front of a window. The black edge provides greater contrast and better fabric strength.

- **Ideal for projectors**
- **Opaque black back**
